HEAD LICE TREATMENT

7th September 2011

Dear Parents,

Over the past few weeks, there have been a few cases of Head Lice in Stage 3. Please ensure that you check your child’s hair regularly so that we can stop lice spreading from child to child.

If your child has head lice, it is as important to wash all bed sheets, towels and pillows that your child has used. It is also crucial to remove all eggs from the hair.

A new product is available at chemists (and is in stock at Stanhope Gardens Chemist) called LICE BREAKER. It costs approximately $15 and is a comb, which catches both eggs and lice. Used with a treatment, this will help to stop the spread of lice. More information is available at www.dermatec.com.au.

We realise that this can be a stressful time for all people involved—parents, teachers and children. We would like to thank you in advance for your cooperation and understanding as we try and eliminate this problem.

Kind regards,

Kylie Clark
Leader of Learning
